PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	8915	SESSION NUMBER:	03
DATE OF SESSION:	06 JUN 89	DATE OF REPORT:	06 JUN 89
START:	0850	END:	0945
METHODOLOGY:	CRV	VIEWER ID:	095

1. (S/NF/SK) MISSION: To determine and describe the key functions and supporting activities of a target consisting of structures represented in overhead photography.

2. (S/NF/SK) VIEWER TASKING: Informed 095 that target had been worked before, and gave encrypted coordinates 623826/696347 only.

3. (S/NF/SK) COMMENTS:

a. Inclemencies: Tired.

b. 095 restarted in Stage 4, and was in immediate contact with the target. Habits indicated excellent site contact. 095 was informed that "key function" and "activities" were the goal of the session.

c. Summary of Information enclosed.

4. EVALUATION:

5. SEARCH EVALUATION: N/A

SUMMARY OF INFORMATION

Site is a series of structures like (A/S) a compound. One structure is several stories, square, broad and wide. ^(Sketch, p.1) This large structure is the pivot point for activity at the site. Next to this large, broad structure is a smaller structure of concrete block construction. The land where the structures are had to be levelled before they were built.

The activity at this complex is very structured. It is planned step by step, very orderly--one thing after another. Workers here are government civilians. This place has an overwhelming sense of order and practicality around it. Sense of rigidly followed line and block diagrams and flow charts. The large building seems to produce mainly a paper rather than a material product: analysis is conducted. The building has a sense of 'ordinariness' about it. Lots of practical items done. R&D, while present, is not the main purpose but rather a minor by-product that must be attended to, as it is expected.

The small building is reminiscent (AOL) of a garage (repair type). There are metal beams across the ceiling from which things are suspended. There is equipment, wires and cables.

(AOL: diagnostic center). In this building, too, all activity is scheduled and organized: timelines are strictly adhered to. There is a black, shiny, curved (A/S as if molded) piece of material that is a protective layer for the top of something. It protects a vulnerable component. It is welded to a vehicle. There is a row of vehicles to which this is systematically and orderly being done. The material is a composite and from the side has several different layers--only the top is black and slick (see sketch page 6). AOL/S: retrofit. The affixing of this piece makes something that normally looks clunky and primitive, look sleek, modern and futuristic when viewed from one angle.

WORKING PAPER

06 JUN 89

TASKER

1. PROJECT : 8915
2. Encrypted coordinates: 623826/696347.
3. Tasking: "The target site consists of structures represented in overhead photography."
4. Required EE1:
 - a. Determine and describe the key function of the target site.
 - b. Describe the activities taking place in support of the key function.
 - c. Provide an overhead perspective of the target site; submit sketches in support of findings.

(SEE OPS FOR THE CONDUCT OF A SEARCH IN THIS PROJECT ONCE 4A THROUGH 4C HAVE BEEN SATISFIED.)
